

**Your Partner for Engineering Excellence Let us Explore Together**

**Engineering Excellence**  
In Precision Parts

### Introduction:

Pragati technologies is a sophisticated manufacturer and exporters of precision parts in small to bulk quality as per customers specification and requirement.

It has started this business since 2005 and having a setup over 10000 sq yard factory located at Ahmedabad the finance capital of Gujarat.

### Infrastructure:

We Have sophisticated engineering unit in Gujarat, India. We are leading manufacturer and exporters of precision engineering components, in short \to long-term batch quantity using latest technology machines like CNC Vertical machining, center up to 5 AXIS, CNC Wire cut, CNC Turning, CNC Swiss Automate, EDM Drill, EDM Spark. and Automatic press Our design department is equipped with latest design technology software like Unigraphics Nx4. Autocad, Mastercam, Elapt and Elcam.

Having rich experience for more than two decades in engineering industry. We are the most sophisticated and leading engineering setup of CNC machines that spread over 10,000 sq yard area at its state-of-art manufacturing facilities.

Present setup reflects out company's commitment to become an excellent House of CNC Machines, we acquired nearly two dozens of CNC Machines, high precision measuring instruments and testing equipments. Our strategic focus is on providing superior machining capabilities while designing and implementing processes that are cost efficient.

Our Quality

**P**rogressive  
**R**eliable  
**A**ffirmative  
**G**rowth oriented  
**A**nswerable  
**T**rustworthy  
**I**nnovative

Growth is natural in development process

Pragati Technologies believe firmly that the Quality control and development is a fruit of our heartiest effort for customer's satisfaction in all dimension. Quality Execution of awarded. task in time and effective component costing.

Twenty years of improving experience in engineering field and thrust of adopting new technology has made us a confident visionary to meet requirements of engineering excellence.

We are manufacturing Sheet metal components, Milled components, Turned Parts, Electrical Stamping, Motor Stamping, Product Development, Jig Fixtures, Gauges, Typical Dies and Components, mass Precision Components and Parts etc.

We offer a complete and comprehensive line of machining services. During past years we have made a huge investment in acquiring most modern and sophisticated machineries and manufacturing equipments in our factory. This is the reason of our success to become a key player in this competitive market.

Serving various industries in India for their engineering requirement we have developed network of trusted local vendors who will meet with our quality standard in our expansion program.

### To Whom We Serve

We have large database of the efficient manufacturer to explore the out source opportunity in field like, Electronics, Medical, Aero Space, Pharmaceutical, Automobile and other areas where precision machining and Assembly of complex component is required.
